Course Overview

Course Overview

PRO-BMT (“*Professional Building Management Training*”) provides ABMA Accredited Training programs to support continuing professional development [CPD] for ABMA Accredited Industry Practitioners.

The ABMA CPD – Fire Compliance for Class 2-9 Buildings course is 3-hour tutorial and general overview delivered in easy language for all levels of competency. Targeted toward Facilities Managers, Caretakers, strata managers or Committee Members seeking to gain an understanding of the mandatory maintenance requirements for the fire protection system of Class 2-9 residential strata and mixed-use commercial schemes, the CPD-FIR course will supply an overview of existing legislative requirements. Emerging Compliance & Performance Assessors seeking to build capability so as to offer services to the sector would also benefit from this introductory course.

Learning Outcomes

Upon completion of the CPD-FIR Course, participants should have achieved the following learning outcomes: -

- A general overview of the fire protection system for Class 2-9 buildings, and hydrant system for Class 1a townhouse schemes
- An overview of legislative standards imposing mandatory maintenance & reporting duties
- Understanding assets and their life cycles
- Frequencies of testing regimes
- Review of “As Cons” and Baseline data
- Managing defects in the fire protection system
- Fire system maintenance checklist

Teaching Strategies & Objectives

The CPD-WHS Course is an introductory tutorial aimed at entry level. All PRO-BMT Trainers are ABMA Accredited Compliance & Performance Assessors and are therefore able to provide relevant information to the participants.

Assessment & Certification

All participants who successfully complete the CPD-FIR Course are issued with a PRO-BMT Certificate to the ABMA continuing professional development standard. This certificate will support application for ABMA Industry Practitioner Accreditation.

Pre-Requisite Qualifications

There are no pre-requisite qualifications required to enroll in this course other than a sound level of comprehension in the English language.

Course Materials

All participants must purchase the current year reference textbook for the Course: - ABMA Building Management Code© [state specific version].

Resources

Resource references are provided during the course including the ABMA Fire Protection System Guide and a fire system maintenance checklist.

Further Study

For those seeking to build specialist capability in this area the Compliance & Performance Assessor [3-day workshop] is highly recommended.

The ultimate qualification available for Facilities Managers, Caretakers and Strata Managers in residential and mixed-use strata facilities management is the Diploma of Building Management.
